Excerpt from:

"Shopping in Wingham. October 26, 1987"

WHAT IS A CUSTOMER?

A customer is the most important person in any business.

A customer is not dependent on us, we are dependent on them.

A customer does us a favour when they come in.

A customer is part of our business, not an outsider. A customer is not just money in the cash register. He is a human being with feelings and deserves to be treated with respect.

A customer is a person who comes to us with their needs and wants. It is our job to fill them.

A customer deserves the most courteous attention we can give them. They are the lifeblood of this and every business. They pay our salary.

Without them, we would have to close our doors.

"WE WON'T EVER FORGET IT"

*"Proud of our past,
looking forward to our
future together!"*

Gordon McGavin had competed in plowing match competitions throughout the province. He was awarded the Canadian Plowing Championship at the International Plowing Match in Niagara Falls in 1926. He was approached by different machinery companies to sell their products. Henry Ford personally asked him to retail Ford Tractors but Gordon declined because Ford wanted the family farms signed as collateral.

John (J.J.) McGavin, Gordon's father had the first radio in the area. The neighbours snidly asked him if "he was still listening to the noise in the box, Johnny". He put a Delco system for electric power at the farm in McKillop in 1915 which cost \$540. Later he wired the barn and shop for \$240. The Wind Charger was mounted on the windmill stand. In 1936 he and Gordon built a dam in the creek and installed a 6 horse power Water Turbine which charged 32 volt batteries.

History of McGavin Farm Equipment.

1936 - Started as a Cockshutt dealer on the home farm where Jeff and Shannon McGavin and family now live.

1946 - Became a New Holland dealer

1947 - Became a New Idea Equipment dealer

1949 - Had many 'short lines' to retail

1951 - Moved to Village of Walton across from Walton Community Hall.

1953 - Now retailed farm implement companies such as: Eastern Machinery, Turnco, Geo White, Mohawk etc.

1957 - Became a Nuffield Tractor dealer. G. NEIL MCGAVIN graduated from the Ontario Agriculture College and joined his father Gordon.

1958 - Was cancelled as a Cockshutt dealer because was selling too much New Holland, and Nuffield equipment. Installed the first 'radio telephone' in service truck. It was very expensive at \$3.00 per call plus long distance!

1963 - Moved to the former Walton school location when new Walton school was opened.

1964 - Built a workshop on back of the school building - 30' X 40'. The parts department and offices were located upstairs in the building.

1975 - McGavin Farm Equipment Ltd. became incorporated

1976 - Founder of the company, William John GORDON MCGAVIN died.

1978 - Built a new 40' X 80' addition onto the shop to be used as the workshop. Moved the parts department downstairs into the former service shop.

1984 - BRIAN Neil McGAVIN graduated from the University of Guelph OAC and joined his father in the business.

1988 - Ford Motor Company bought New Holland and wanted purity i.e. to sell their products only. Built a new addition 50' x 105' to house showroom, offices, parts etc. A new company - McGavin Farm Supply Ltd. was established with Brian McGavin as President. It would retail only New Holland Equipment.

1992 - JEFFREY John Gordon MCGAVIN who had graduated from the University of Guelph in 1991 left United Co-operators of Ontario (UCO) to join his father Neil and brother Brian at McGavin's. Jeff later became President of McGavin Farm Equipment Ltd.

1996 - Built a new 100' X 100' Workshop and 40'x40' washbay, incorporated with the 178 & 1988 building.

2008 - Built new facility for McGavin Compact Equipment where the 'church shed' and old frame schoolhouse were located. Retail Bobcat Industrial and Rental equipment, landscaping equipment etc.

McGavin Farm Equipment and McGavin Farm Supply and McGavin Compact Equipment employ 25 people who serve agriculture in Southwestern Ontario.

ECO Blue™
COOL, CLEAN POWER

NEW HOLLAND
AGRICULTURE
FARM RAISED™

Available now!
Come check
them out!

Introducing EcoBlue™, our new Tier 4A engine solution for New Holland 100+ hp tractor like the new T7 and T8 Series. Using selective Catalytic Reduction (SCR) technology, EcoBlue turns cool, clean air into more power as it maximizes fuel efficiency and reduces NOx. Plus EcoBlue is the only technology with the capability to achieve Tier 4 emissions requirement coming in 2014, so New Holland puts you a step ahead. See your New Holland dealer about tomorrow's emissions solution available today.

It's the NEW T-8 Series tractor. With the longest wheel base in the industry, and new improved suspended front axle option. T-8 tractors give a comfortable ride and better traction without sacrificing maneuverability. Own a tractor that's truly one of a kind - a New Holland T-8 tractor.

NEW HOLLAND
AGRICULTURE
FARM RAISED™

CLEAN ENERGY LEADER

In the T7.270 Tractor with autocommand™, that means 7% more power, 13% more torque and a best-in-class +10% savings in fuel use for a generous payback.

6 McGavin's Rural Express

*All rock pickers are not built equal . . .
let me introduce you to a Highline*

Guided Reel Picks More Rocks

Highline's rock pickers have a guided reel that makes rock picking more efficient than conventional rock pickers. Large 8" bogie wheels follow a special track which guides the reel arms parallel to the ground, giving you over one foot of picking action in front of the apron per bat revolution.

The guided reel lifts rocks up the near-vertical apron to sweep rocks away while allowing dirt to drop back to the ground. The guided reel collects and lifts the rocks instead of relying on the apron to push and collect them.

Compare rock pickers

Highline's rock pickers are built to stand up to the everyday pounding of rock picking. Highline uses an extra-strong reinforced perimeter frame that also extends across the front of the picker. Highline's rectangular frame also provides a solid foundation for years of maintenance free operation. The frame across the front of the rock picker is positioned high enough to give plenty of clearance for larger rocks while maintaining the overall strength of the frame.

The XL6084 dumps rocks 6 feet high while the XL78 dumps rocks 7 feet - plenty of height if you are using a truck or trailer to haul rocks off the field. Because Highline's rock pickers also dump their loads further back than many pickers, rock piles can be made higher and tighter and trucks and trailers can load closer to the center. Highline's large buckets and cleaner picking will increase efficiency less running back and forth to rock piles.

Fast Transporting

Standard hydraulic swing away hitch makes moving from the road to the field even easier. The XL78 with its full seven foot picking width can be transported with only a few feet protruding from the shoulder side of the tractor.

SALFORD RTS - The Residue Tillage Specialist

Salford Continues to add to the Popular RTS Series

Salford Farm Machinery - Salford, On

The RTS Series has become a mainstay for Salford Farm Machinery and for some it is the definition of term Vertical Tillage.

Recent years saw the addition of the RTS Fertilizer Applicator and the Coulter Chisel.

These units feature 500lb or 1000lb shanks in addition to the RTS individually mounted coulter and harrow systems.

The shanks are fitted with either chisel points to add deeper soil density reduction to the RTS; or you can add fertilizer application wear parts such as NH₃ Knives.

Last year at the National Farm Machinery Show in Louisville, KY Salford launched the RTS Extreme.

The Extreme is lead by 2 rows of 20" shallow concave blades in order to more aggressively resize tough crop residue, as well as mix more soil with residue to leave a darker finish and further promote decomposition.

This year at the show in Louisville Salford was recognized with a Farm Industry News 2011 FinOvation Award for the RTS Extreme.

Salford received the FinOvation Award, given by Farm Industry News, because the RTS Extreme was recognized as one of the most innovative agricultural products of 2010, based on reader interest.

Nearly one year to the day since the launch of the RTS Extreme, Salford is once again proving to be driven by innovation and design with the

release of the RTS Heavy Duty. The RTS Heavy Duty adds a whole new dimension to this series of vertical tillage tools.

RTS Heavy Duty features a heavier shank design and larger hubs for blade mounting. This allows it to carry larger blades and coulters for deeper tillage, and even more aggressive residue resizing.

"We always knew there was the potential for the RTS to till deeper and boast more weight per blade,"

says Salford General Manager, Geof Gray. "Our engineer's never shy away from a challenge. The RTS Heavy Duty couldn't come at a more relevant time for the industry."

The RTS Heavy Duty comes when no-till producers, especially corn producers, are struggling with tougher crop residues due to today's higher yielding plant genetics.

The RTS Heavy Duty is available as a 'standard' all coulter machine, or as an RTS Heavy Duty Extreme.

Residue Management Tools for Every Farm

Salford's
9700 CTS for
Conservation
Soil Density
Reduction

The RTS platform from Salford is the basis for the most versatile family of residue management equipment you can purchase. Start with the RTS and its class leading speed and economy. For even greater versatility you can fit NH₃ shanks for anhydrous application, choose chisel points for deeper soil density reduction, or set the RTS up for seeding and fertilizing to cover more acres at a time. Or take advantage of the more aggressive performance of the RTS Extreme, featuring individually mounted shallow concave disc blades to mix even more soil and residue to accelerate decomposition. Experience the Salford Difference.

HYDRAULIC SELF LEVELING

The industrial proven hydraulic self-levelling system is amazingly accurate and out performs mechanical self-levelling that can often cause blind spots for the operator. Self-levelling works in lift and lowering and is not affected by oil or operating temperature, and the operator can override it easily from the stick controls on the fly as needed.

18 McGavin's Rural Express

Engineered for performance and durability.

Move it.

Nothing moves grain faster and more reliably than a Brandt GrainBelt. In fact, we make the highest capacity, most durable auger-free conveyors on the market. Our 15 Series moves in excess of 6,000 bu/ hr,* while the 20 Series moves in excess of 10,000 bu/hr.** Plus, Brandt's

patented EZTRAK feature and exclusive spring-loaded belt tensioning system make maintenance easy and help eliminate any potential belt damage. That means quick, worry-free grain movement that saves you time, money and headaches.

FOR MORE INFORMATION CALL 1-866-4BRANDT
OR SEE YOUR LOCAL BRANDT DEALER

www.brandt.ca

Brandt
AGRICULTURAL PRODUCTS LTD.

*The Brandt 15 Series conveyor moves wheat in excess of 6,000 bu/hr, soybeans in excess of 7,500 bu/hr.** The Brandt 20 Series conveyor moves wheat in excess of 10,000 bu/hr, soybeans in excess of 12,000 bu/hr.

**PICK UP WET GRASS,
LEAVES AND DEBRIS.**
~ and lots and lots of admirers ~

The PowerVac™ Collection System

The powerful vacuum action of a PowerVac™ Collection System picks up virtually anything, leaving a manicured finish. A trash-ingesting steel impeller chops, propels and compacts debris for fewer stops while you mow. And when it's full, our exclusive PowerTilt™ collector empties at the flip of a switch for uninterrupted productivity.

Pre-Season Discount

**5% off if ordered
before April 15th!**

Demco
Never make the trucks wait

**Demco
850 & 1050 bushel
grain carts redefine
harvesting efficiency**

Loading an entire semi-truck load of grain with a Demco grain cart is more than speedy - **2 1/4 minutes for the 850, 3 minutes for the 1050 bushels model.** We've also made it less challenging. The 18" auger projects out and forward so the operator has a clear view of the grain flow. And at the end of the auger we've added an adjustable spout so the flow can be directed from side to side.

The construction of the 850 & 1050 bushel grain carts are equally impressive. Quality components and heavy duty materials are joined together with superior design and manufacturing processes. The strength and durability of a Demco grain cart will perform for many harvest seasons to come.

**It is Comforting to Know Today's
Residue Management Solution
is Prepared for the Future!**

As residue management challenges are getting tougher, be confident you investment equips you for tomorrow's residue and agronomic needs. With the latest genetics and use of fungicides, healthier plants have provided increases yields, as well as increased amounts of tough residue. The DOMINATOR® offers the most residue capacity, and is designed for today's tough conditions while providing the best seed bed levelling in its class. Experience why DOMINATOR® owners highly recommend this combination tillage system to accomplish your agronomic goals - Fall or Spring.

QUALITY HAY THAT STAYS THAT WAY.

CROPSAVER™ CROP PRESERVATIVE

New Holland's buffered propionic acid inhibits hay spoilage, even in hay with up to 30% moisture, without damaging baling equipment.

AUTOMATIC TOUCH-SCREEN CONTROL SYSTEM APPLICATOR

This state-of-the-art New Holland system accurately applies CropSaver preservative based on precise readings from on-board moisture sensors. It also monitors your baling speed and the amount of preservative being applied so that all of your hay is preserved without using more product than required.

Competitive
Pricing

*Your New Holland dealer has the best
equipment and materials you need to
make the most secure bales and preserve
the quality of your valuable hay.*

NET WRAP

New Holland net-wrapped bales are smooth, weather-resistant and easy to handle. Wrapping takes fewer revolutions than tying with twine, so you can save time and dramatically boost your productivity.

GENUINE NEW HOLLAND TWINE

Bales tied with New Holland twine are secure and tight, and resist the effects of weather, sunlight, mildew and repeated handling. You'll appreciate the superior strength and knotting performance of genuine New Holland twine.

"CATROS" By Amazone

CATROS CULTIVATOR HIGH SPEED RESIDUE MANAGEMENT

This high-speed shallow tillage tool has been proven world-wide to cut, piece and mix various crop residue including high yielding corn. The end result leaves a re-compacted seed-ready field. The Catros design achieves its best results at speeds over 8 m.p.h. It handles these speeds due to its unique rubber spring disc shank design. Catros is configured to fit many field sizes with 3-point mounting to larger, more conventional trailed units. Ten foot to 40 feet (3 -12m) working widths.

BREAKING UP IS EASY

Wood Splitters ▶

Every second counts when you're trying to get the job done. Wallenstein wood splitters are built rugged and are simple to use, easily breaking big jobs down piece by piece.

▶ **Wood Chippers** - Big jobs are a lot easier when the pieces just fall into place. Make brush disappear with Wallenstein's rugged line of chippers - these self-feeding machines really clean up.

WALLENSTEIN

3
 YEAR
 WARRANTY

There's a lot you can do with the right equipment. Wallenstein provides property owners with equipment designed to make work feel more like play.

Bobcat of Huron

The V638 VersaHandler TTC has a lift height of nearly 39 feet. Optional stabilizers increase the stability and operating capacity throughout the lift cycle.

0% Finance Available

Pick a task.

Combine the speed, agility and strength of a skid-steer loader with the extended reach of a telescopic, and you've got a machine that's versatile enough to handle anything.

Pick your VersaHANDLER machine.

Each machine in the VersaHandler® lineup has its own unique advantage. Whether you need the compact size of the V518, the excellent rated load capacity of the V723, the incredible lift height of the V638 or the unmatched attachment capabilities of the V417, the Versa-Handler TTC is built for the work you do.

www.bobcat.com

Skid-Steer Loaders
Dirty jobs are easy in the new M-Series Bobcat loader. The new best-in-class pressurized cab provides the best possible seal against dust and debris.

NEXT TO YOU, IT'S THE HARDEST WORKER ON THE FARM.

Whether you're feeding livestock, mowing, cleaning barns and pens, putting up fence or just moving from place to place on your land, Bobcat has a hard-working machine and labor-saving attachment that can help you do more in a day – and make it more enjoyable. Whatever the job, whatever the chore, Bobcat® equipment works as hard as you do.

Learn more at www.bobcat.com/agtasks

Compact Track Loaders
Feed livestock on time every time with minimum effort – even if the barnyard is soft, wet or muddy. High-flotation Bobcat compact track loaders keep going when other machines bog down.

Toolcat® Utility Work Machines
Lighten your workload with a super-versatile Toolcat utility work machine. Chores are quick and easy with its attachment lift arm and Bob-Tach™ mounting system. Equip the new 5610 with an optional 3-point hitch and use your category 1 implements.

VersaHANDLER® Telescopic Tool Carriers
Reduce feeding or stacking time by lifting large bales over fences – without even opening the gate. The V417 includes Bobcat's legendary Bob-Tach mounting system for fast, easy changes of more than 25 attachments.

Compact Tractors
Eight Bobcat compact tractor models – ranging from 22 to 50 horsepower – make mowing, loading, tilling, road maintenance and snow removal simple. Tight areas are no match for these highly maneuverable machines.

38 McGavin's Rural Express

A little bit of History...

Grandparents J.J. & Estella McGavin must have been forward thinkers.

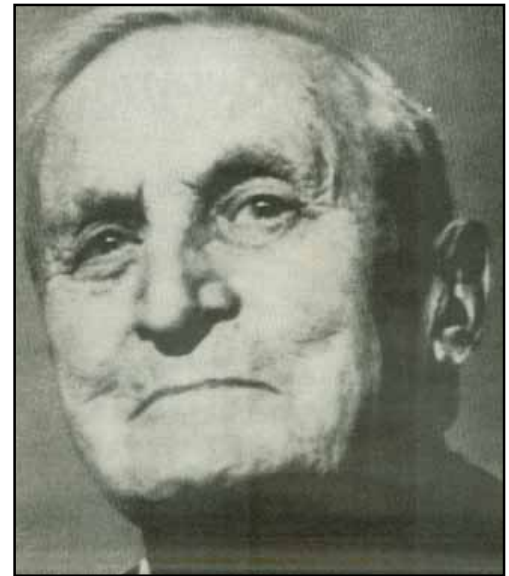

1915 Delco electric system; 32 Volt for \$540

1918 Wired shop & barn and put where windmill was and a wind charger was mounted

1936 Built temporary damn and installed a 6 hp water wheel

1937 Made permanent dam and used it until 1948. Dr. John Turnbull of Seaforth remembers how hard it was digging the footing.

My grandfather Stewart on my mother's side then returned to Brussels. Their homestead was in Langley, North Dakota.

J.J. McGavin

Dad (Gordon) enjoyed inventing equipment. His stook loader was a hay loader running backwards to load stooks onto a wagon. He tried to patent it, but combines were coming in at this time and stooking was a lot of manual labour.

He also installed a buzz saw on the front of the tractor, and a drag saw on the back.

These would not have met the safety standards of today, as they did not have many shields.

Another invention was a land packer with a grass seeder box mounted on top. This was the same idea as the Brillion Seeder today!

He mounted a posthole digger on a manure loader – this is also similar to today's equipment, except now they are driven by hydraulic motors.

One of the greatest inventions in my mind has been the hydraulics. Their amazing lifting capacity comes in small motors that you can hold in your hands. They can produce up to 15 HP and can be in hidden spots.

McGavin Farm Equipment

Walton, Ontario 1-877-887-6365 or 519-887-6365 www.mcgavinequip.com

Dad won the 1926 Canadian Plowing Championship and Henry Ford wanted him to be a dealer, but he wanted the farms for security. Cockshutt, a family company, was willing to take a chance and he became an implement dealer on the farm where I grew up!

1958 Nuffield, an English company, came into the picture. Our money was worth more than theirs and we could see similar horse powered tractor as a Cockshutt (Canadian made) and throw in a baler. At this time, Cockshutt was taken over in a hostile stock take over by an American inventor. Many of the Cockshutt family were let go and the friendly family farm equipment dealer was turned into a high pressure selling company and service was not their main concern.

Some interesting facts I came across:

A man wrote from on a Huron County Jail letter-head asking if it was okay that he could not pay his bill until March. If our answer was no, we were to respond to the above address!

In 1944, Canadians dropped 85,500 tons of bombs. This caused steel to be short in 1945 for farm equipment.

***From Walton's Mountain,
keep smiling, Neil McGavin***

J.J.'s water wheel

Neil's Funnies:

A man came into a restaurant with an ostrich and ordered a toasted cheese sandwich. He looked at the ostrich and it nodded the same. The waitress said that it would be \$9.50 and he pulled that exact amount out of his pocket. This went on all week – he would order, the ostrich would agree and he would have the exact amount of money in his pocket. On Friday he ordered steak and the ostrich nodded the same. \$31.50 was the amount this time, and again the man pulled out the right change.

When the waitress brought his food, she asked about the ostrich and how he always had the right amount of money.

The man explained that he had been cleaning his attic when he came across an old lamp and the genie that came out gave him two wishes. The first was that he would always have the right amount of money for whatever he wanted to buy. The ostrich was a different story... he had asked for a tall chick with long legs that would agree with anything he said.
